EXPERIENCE.

Software Engineer - Java / Spring Boot

Jan 2025 → present

GRDF · via Néosoft, Paris

VEGA program: overhaul of GRDF's business-critical gas-distribution information system (energy-supplier relations) toward an event-driven microservices architecture.

- Built and evolved the REST APIs driving the intervention-request lifecycle (core service of the IS) and Drools business rules (decision tables)
- Kafka Avro consumers / producers (Schema Registry), replay of failed flows; migration to the new field-intervention platform and decommissioning of legacy integrations
- Large-scale Spring Batch jobs: daily publications to energy suppliers (CSV / SFTP), bulk file processing, reminders - orchestrated with VTOM
- Feasibility study, POC then rollout of Microcks to share integration mocks across teams (OpenAPI, automated CI/CD import)
- Production and acceptance-testing support: on-call duty and after-hours interventions, bug fixes on release branches, support for business UAT
- Daily AI-assisted development: Claude Code, team context engineering, internal MCP plugins (GitLab, Jira/Confluence)

Java 17 · Spring Boot 3 · Kafka/Avro · PostgreSQL · Drools · Flyway · JOOQ · GitLab CI · SonarQube · Testcontainers · Ansible · VTOM · Microcks

Full Stack Engineer - Java / React

Feb 2022 → Sep 2024

Société Générale · via NormaSys, RISQ division, Paris

NOVA: rebuild of the credit-rating application for non-retail counterparties (SMEs, large corporates, institutions).

- Built performant, scalable REST APIs in Java 11 / Spring Boot; OpenAPI / Swagger documentation for adoption by other teams
- Designed modern, ergonomic React / Redux user interfaces, documented with Storybook
- Spring Batch: migration and synchronization of sensitive data from the legacy system; daily batch jobs
- Java 17 / Spring Boot 3 migration; transition to a microservices architecture on Kubernetes / Docker, automated Jenkins deployments
- Demanding quality standards: TDD / BDD (JUnit, FitNesse, Cucumber), thorough code reviews, SonarQube
- Onboarded new team members, led agile estimation sessions

Java 11/17 · Spring Boot · React · Redux · PostgreSQL · Kubernetes · Docker · Jenkins · ELK · Grafana · AWS S3

Full Stack Software Engineer

Jul 2019 → Dec 2021

Tanger Med Port Authority · Tangier, Morocco

Port Community System: business-critical portal connecting the stakeholders of Africa's leading container port (customs, freight forwarders, shipping lines, terminals).

- Designed the architecture of the new platform (Kubernetes, Docker, Java / React) - scalability, robustness, availability
- Built the BerthPlan and Slot Management microservices: real-time scheduling of vessel berthing slots (Passenger Port)
- Migration strategy for the PMIS application; EDI / Web Services integrations with strategic partners (customs, FODEX, other ports)
- Functional and technical documentation, end-user training sessions

Java 8/11 · Spring Boot · React · Oracle · SQL Server · MongoDB · Kubernetes · GitLab CI · Grafana

Software Engineer - Electronic Payments

Nov 2018 → May 2019

AXENTIS Group · Casablanca, Morocco

- Full project lifecycle on electronic-payment projects, from design to client delivery
- Built critical features for electronic payment terminals (POS) - card payments, security standards
- Designed and built an invoice financial-reconciliation application

J2EE · Hibernate · JSF · SQL Server · Cordova · UML

PROFILE.

7 years of experience on **business-critical systems** (energy, banking, ports).
Java / Spring Boot backend, Kafka, React. Daily **AI-assisted development.**

SKILLS.

BACKEND

Java 8 → 23, Spring Boot 3 (Web, Data JPA, Batch, Security, Kafka), Node.js

EVENT-DRIVEN

Apache Kafka, Avro, Schema Registry, replay patterns

FRONTEND

React, Next.js, Redux, TypeScript, Tailwind CSS, shadcn/ui

DATA

PostgreSQL, Oracle, MongoDB, Flyway, JOOQ

QUALITY & TESTING

JUnit 5, Mockito, WireMock, Testcontainers, EmbeddedKafka, SonarQube, TDD / BDD

DEVOPS & CLOUD

Docker, Kubernetes, GitLab CI, Jenkins, AWS (S3), Gradle, Maven

APPLIED AI

Claude Code (skills, MCP), context engineering, Python tooling

EDUCATION & CERTIFICATIONS.

2026 AWS Solutions Architect & Developer - Associate
Néosoft training

2025 AI Program - Software Engineering Expertise
Néosoft training

2018 Engineering degree - Computer Science & e-Logistics
ENSIAS, Rabat

2016 Machine Learning
Coursera

LANGUAGES.

French bilingual · English fluent

PERSONAL PROJECTS.

Certi-DPE.fr - AI-powered SaaS analyzing energy-performance certificates (rental compliance).

Next.js · Supabase · GPT-4o · Stripe

Truqar.ma - car rental marketplace (verified agencies ↔ renters).

Next.js · Supabase (PostgreSQL)
